

Installation: hazardous areas - Zone 1 / 2 (Gases) - Zone 21 / 22 (Dusts) - Safe Area

Lighting layout software for internal and external areas available by our office lighting calculation service for lighting installation to right and best position of luminaires in your project.

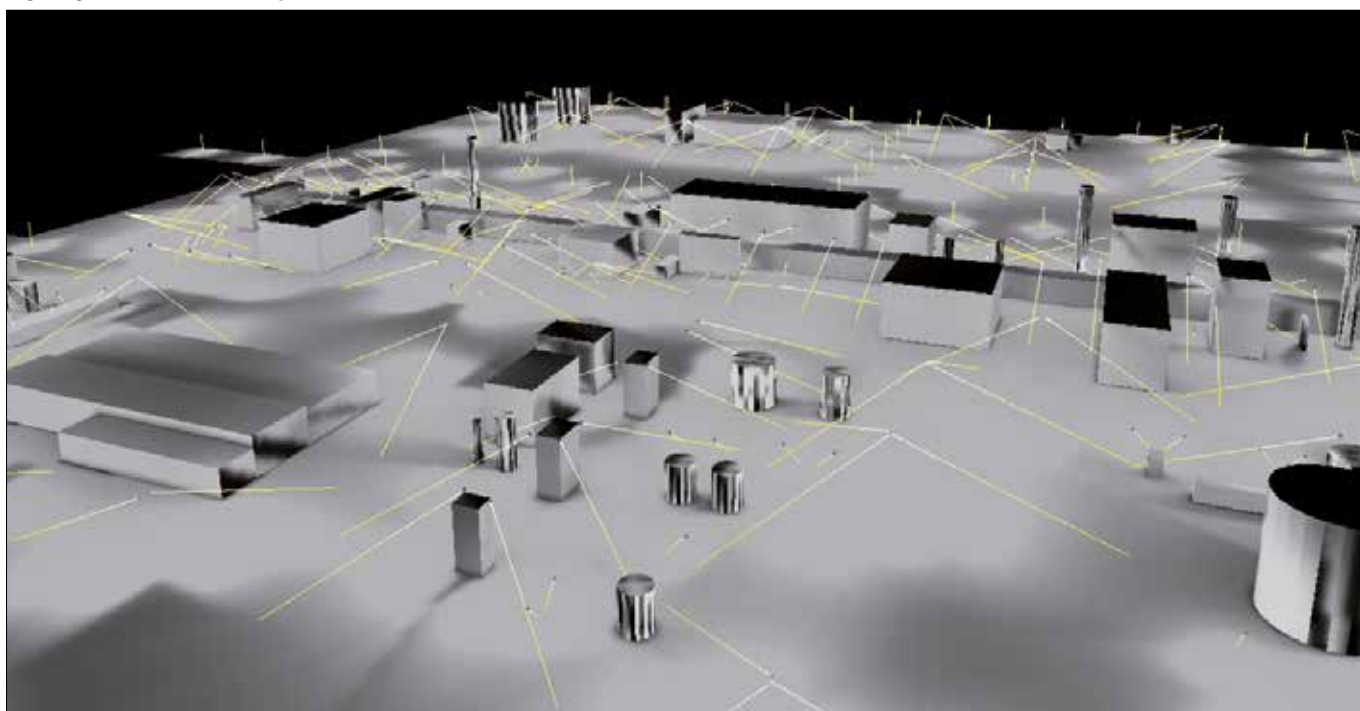

Our technical staff offers its services in planning lighting installation, with photometric graphs and lighting data outputs in full according to Customer requirements.

A well-organized software system is available to calculate the luminance level and the lighting distribution.

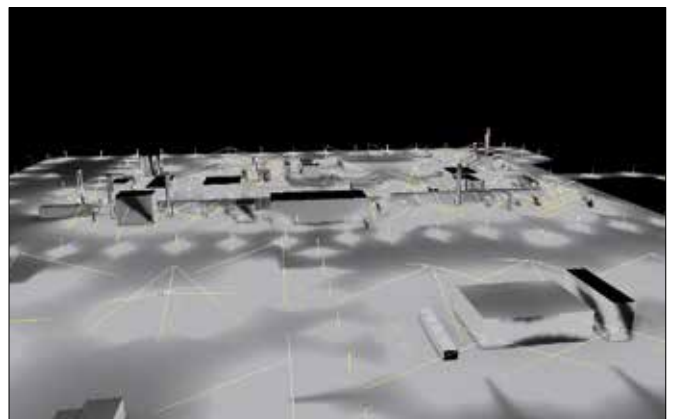

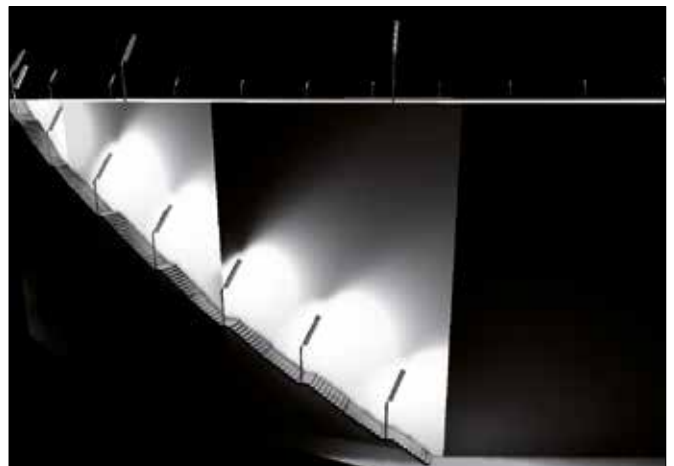

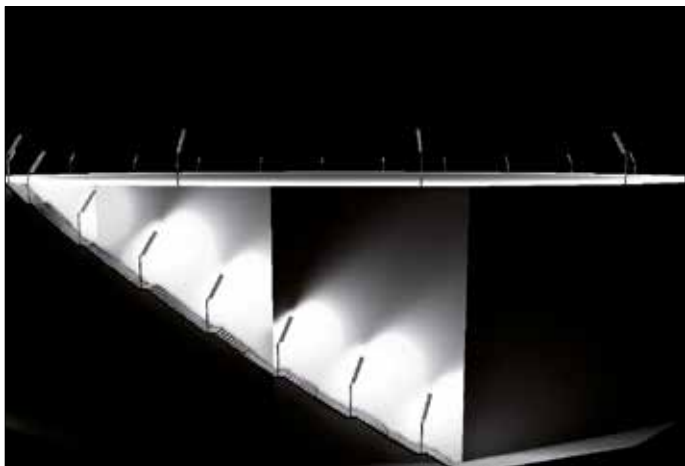

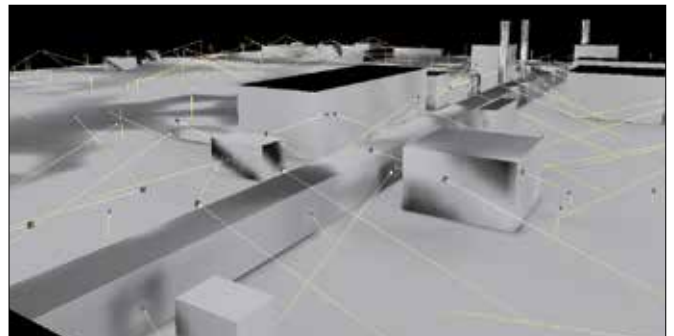

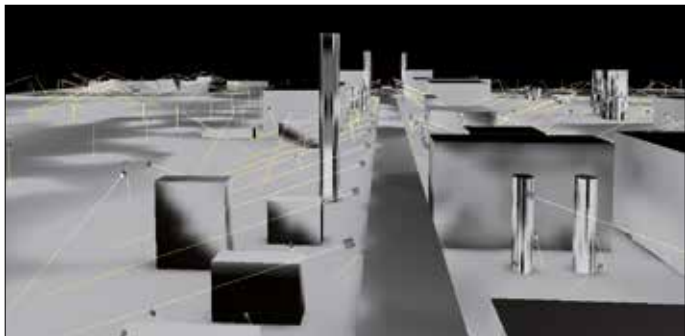

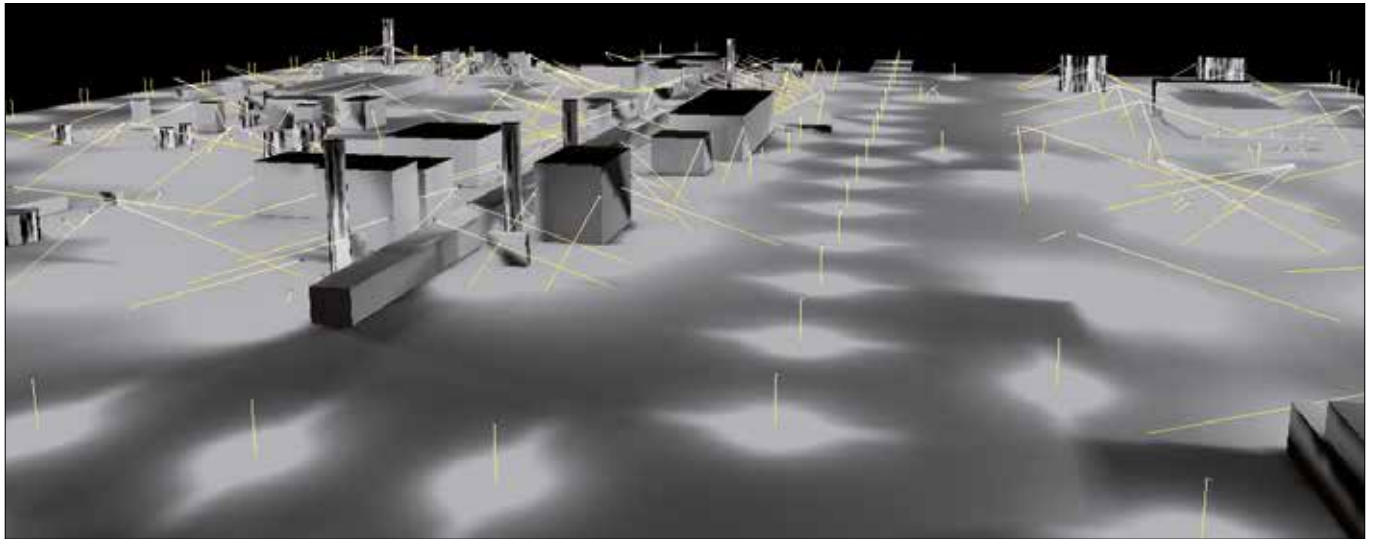

This system will help you to plan the right and best position of BARTEC FEAM luminaires in your project. It is enough you to inform us about the required illumination level: BARTEC FEAM will present you the lighting project quickly.

Using a proper software , our technical staff is able to insert BARTEC FEAM lighting fixtures into a project and produce a virtual image of the area, which shows the real illuminating effect.
